

UPDATE ON THE TULARE WELL

So, the engineer just update me on the procedure that the Pump Company will be doing next week. Starting on Monday & Tuesday they will be patching up the holes inside the well casing and then on Wednesday & Thursday will be pumping out the dirt and gravel and will be evaluating the motor of that well and hopefully to have the Tulare Well back online on Friday – July 31, 2026

And again thank you for your patience
