

WATER CONSERVATION MEASURES

July 16, 2026

TO OUR RESIDENT OF EARLIMART PUBLIC UTILITY DISTRICT

With the arrival of warmer weather, water consumption typically increases, putting pressure on our local supply (Wells) as of now we only have 3 wells are functioning at the moment. We are asking for the resident to follow the conservation measures which is on the website and also in the office. We encourage residents to follow these the guidelines immediately. We are working on repairing the 4th Well (Tulare Well) and hoping to have this well online as soon as possible. Don't have a time line right now, will keep the resident update.

Thank you, for your patience

Earlimart Public Utility District
